

The Sovereign Exit from Jira

OpenProject and Nextcloud Hub

Wieland Lindenthal - Co-founder and CTO of OpenProject
[OpenProject.org](https://openproject.org) · @w.lindenthal:openproject.org · @wielinde@fosstodon.org

Nextcloud Community Conference 2026 · Berlin

Hello!

Nextcloud replaces Microsoft

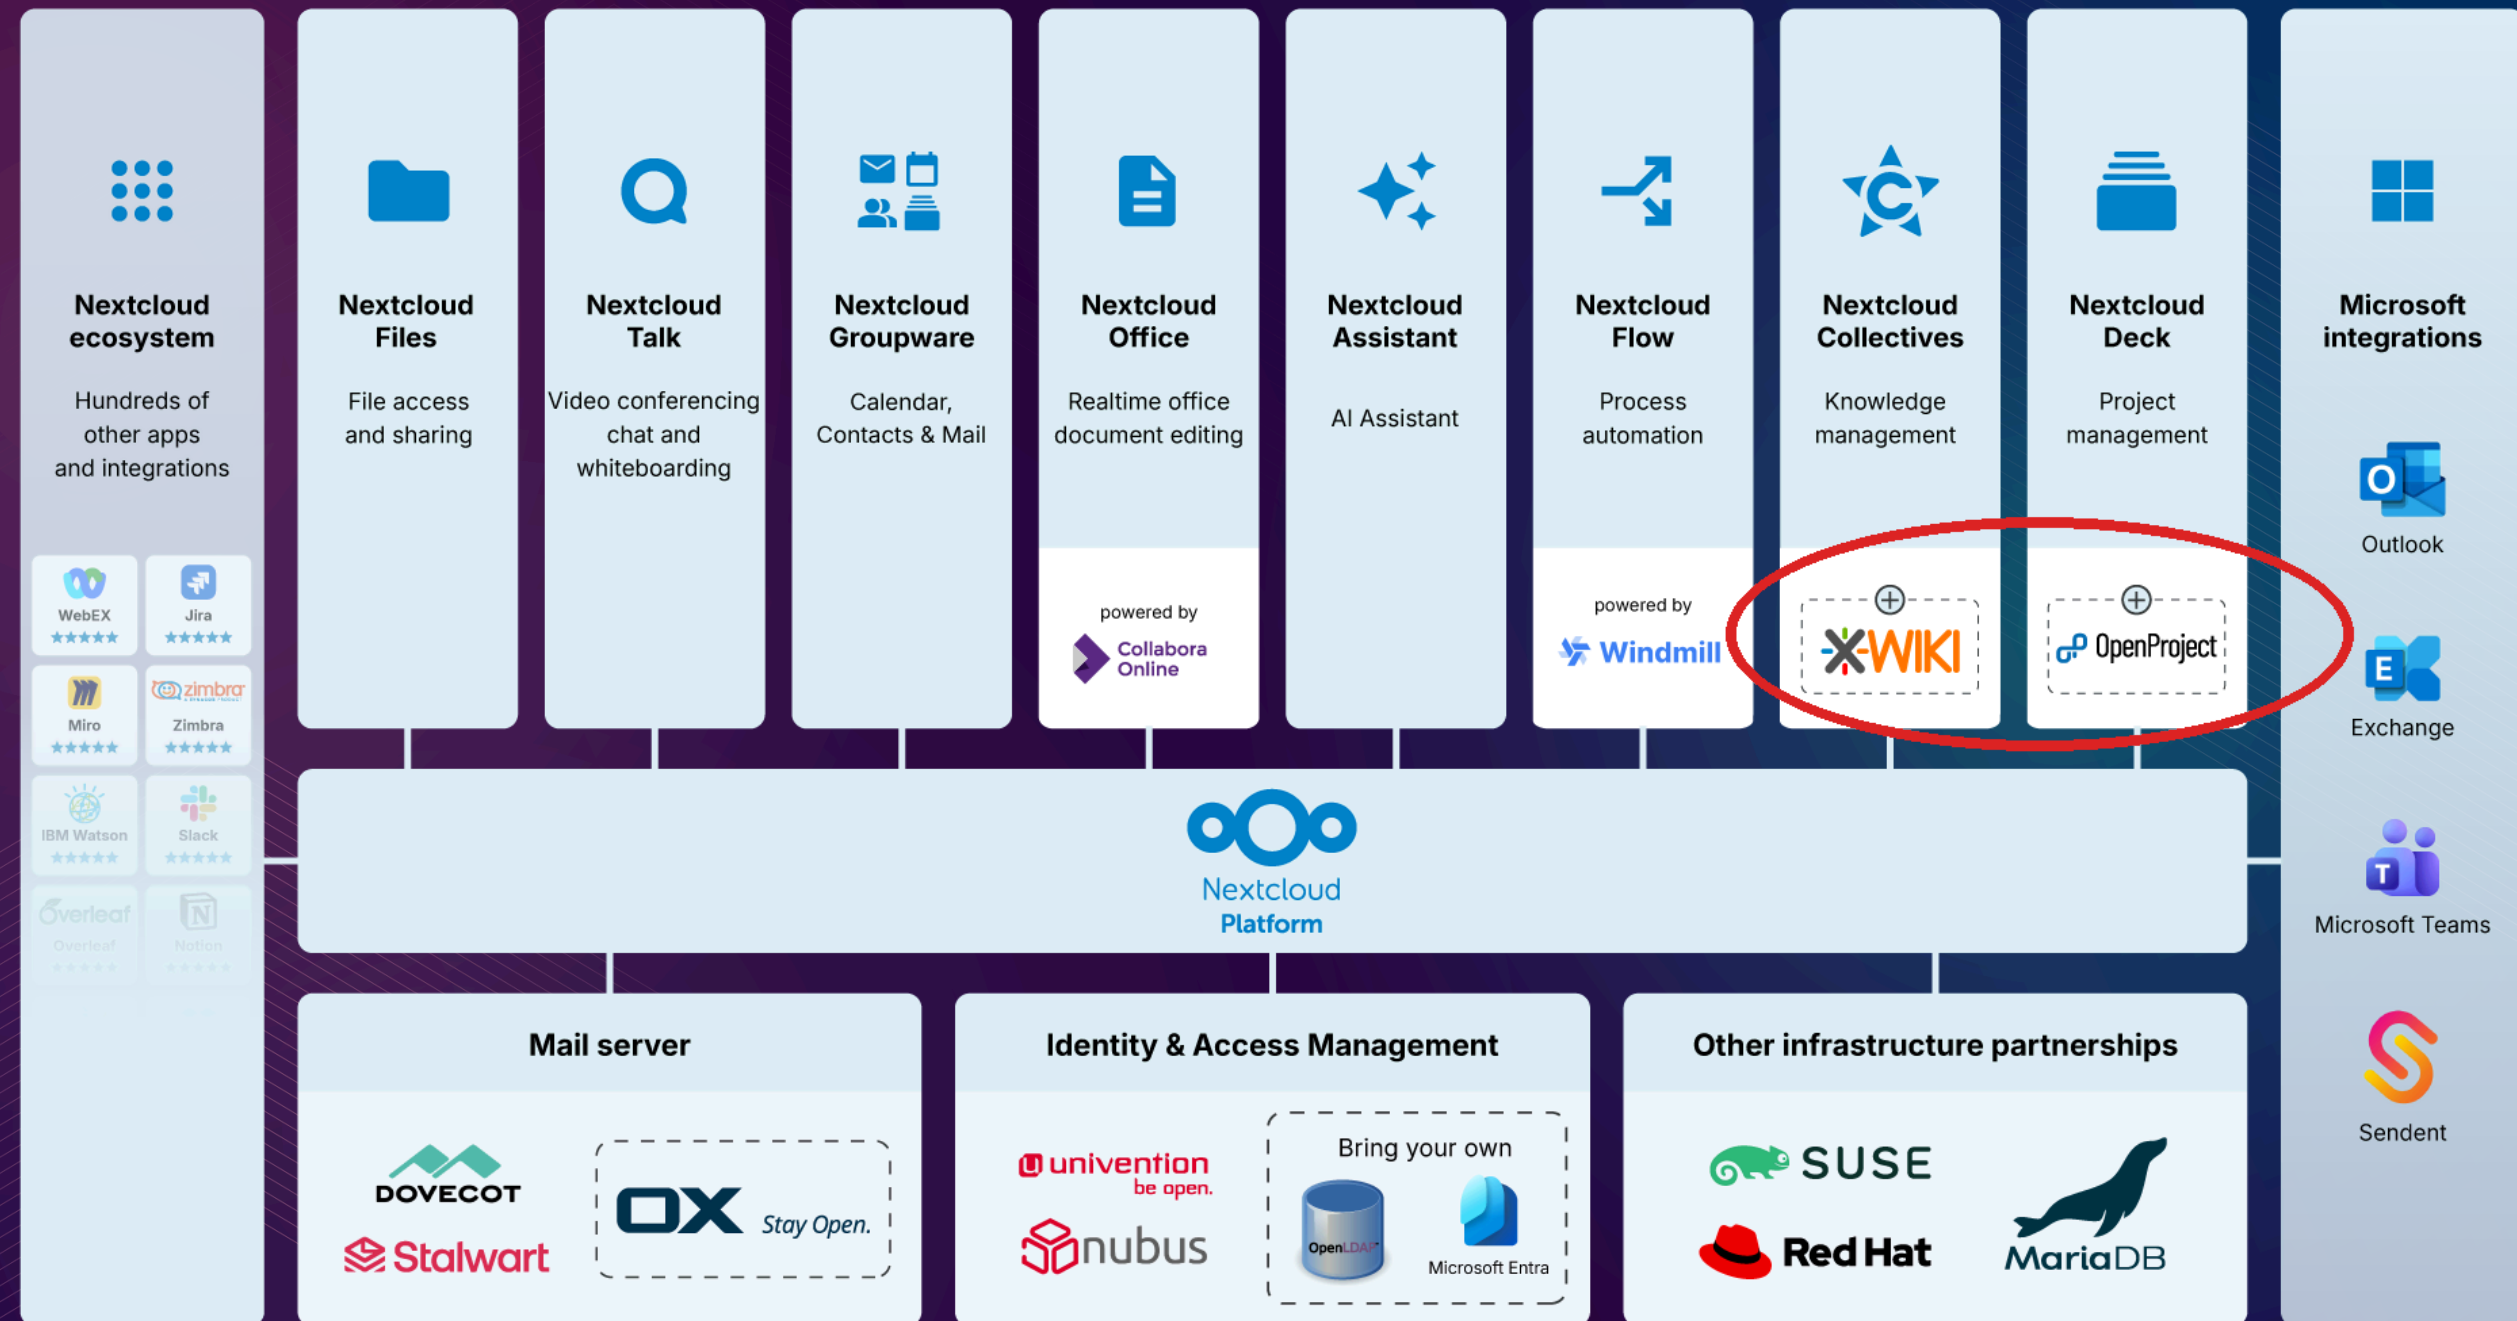

OpenProject and XWiki replace Atlassian

Sovereign Jira and Confluence alternative

United in Nextcloud Hub

Atlassian left their clients alone

- No self-hosting anymore, "End of Data Center" for March 2029
- Jira/Confluence customers are being pushed to Atlassian's cloud
- Cloud is not a viable option for many highly regulated industries
- And also a no go for many others that take data privacy seriously
- Dramatic price development

À la French

TOSIT: The Open Source I trust

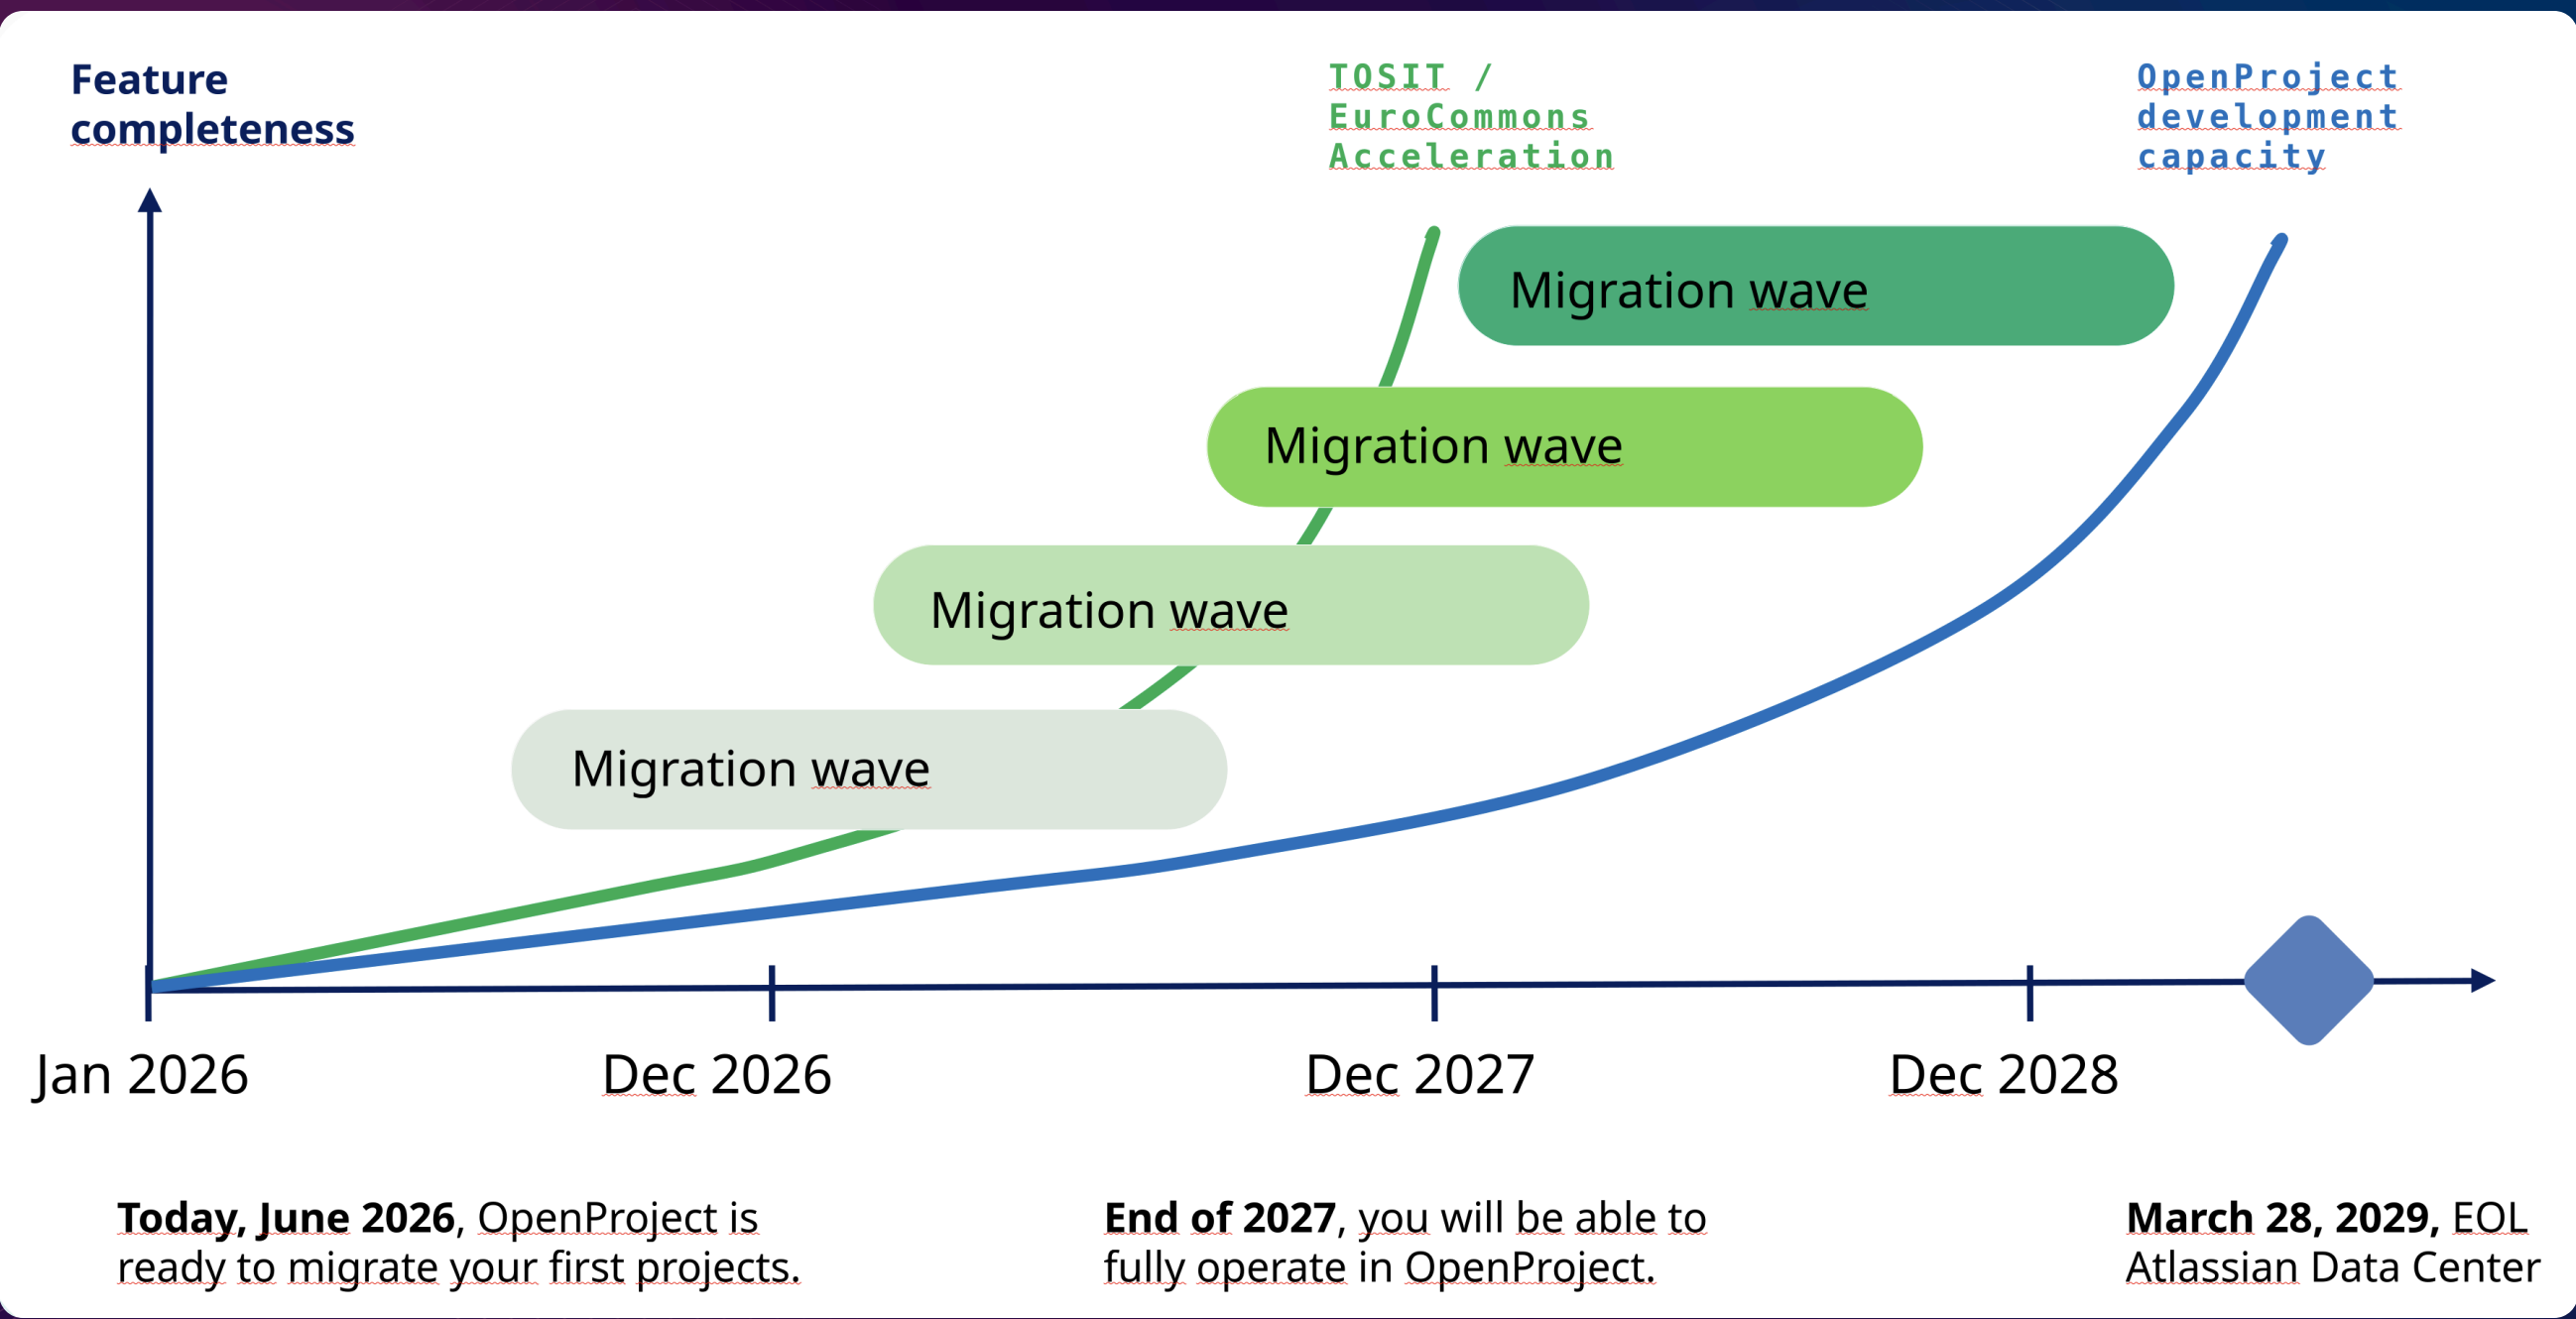

- Energy
- Space
- Public transport
- Finance
- Defence

Checkout their members list at tosit.fr

A public roadmap for the Jira Exit

- During 2 months we had 2 workshops per week.
- ...and many POCs and test migrations
- Finally: A coalition of 11 big French orgs cofinancing the roadmap
- Recognized by EuroCommons as the currently most advanced coalition
- Checkout the [roadmap](#)

Cofinancing to speed up the Jira Exit

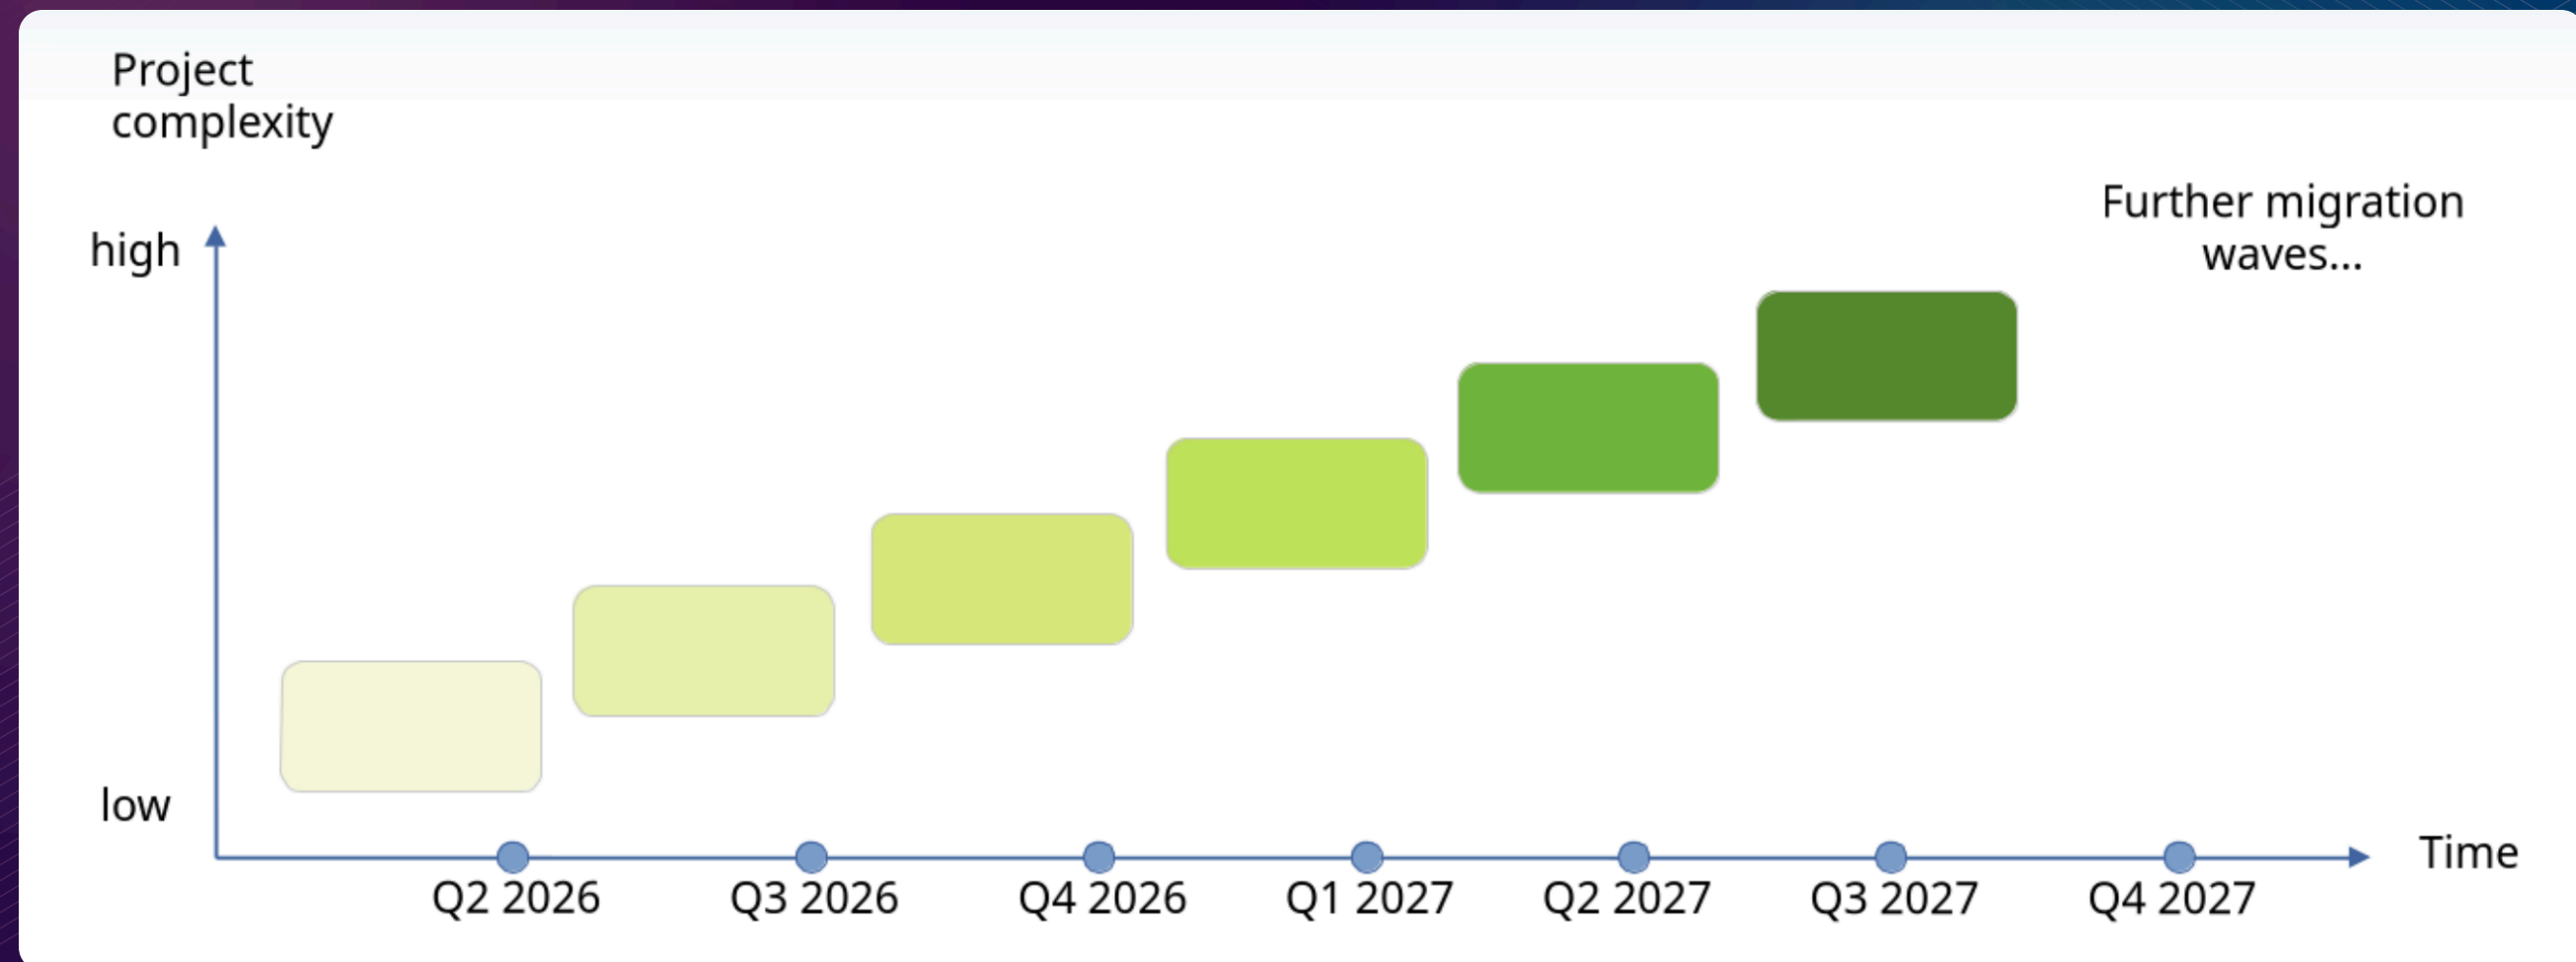

And you can also join the Jira Exit

Every Enterprise subscription helps to speed up the development of Open Source features

Start your migration journey today

Pick one team or project, move it to OpenProject now, and learn as you go. Every step you take builds confidence and momentum, making the full transition smoother and faster.

What we have implemented this year alone

- Jira Migrator
- Project-based identifiers: #8765 -> ABC-123
- New backlogs and sprint planning boards
- Resource Management
- XWiki integration
- MCP server
- ...

Migrate what matters: Your projects and issues

Administration / Import / Jira Migrator

Jira Migrator

Use this tool to import data from your Jira instance. You can configure multiple Jira hosts and choose what to import in each import run.

+ Jira configuration

Beta - Try it out!

This Jira Migrator is currently in beta. We currently only support Jira Server/Data Center versions 10.x and 11.x. Cloud instances are not supported at this time.
Please, help us improve the Jira Migrator with your feedback and private data donations. You can [join the development community](#) of the Jira Migrator.

Organization

Define your company's structure by creating departments and sub-departments in a hierarchical way. This allows you to reflect reporting lines and maintain a clear, structured overview of your organization within OpenProject. You can also import an existing organization structure through [LDAP department synchronization](#).

TASK Update server configuration

In progress Created by Avi Eytor. Last updated on 12/06/2024 5:22 PM.

Before you start

Before working on this task, please consult the following Wiki page for relevant details:

Server configuration basics

The server configuration has to meet particular standards. With each server update, a backup of the previous configuration must be retained for at least 60 days.

This process is not automated, but there is a Feature that is currently in development that will address this very soon: FEATURE #1232 In progress Automate backup of server config

Logs

We maintain logs of all server configuration updates. To learn how to read and update the log files, please consult this Wiki page: Reading and updating logs

Additional considerations

Ut morbi tincidunt augue, more information here: /

Amet massa vitae tortor condimentum lacinia quis phasellus. Mollis nunc sed id semper risus in hendri mattis. Aenean et tortor at risus viverra adipiscing. Diam vulputate ut pharetra sit amet aliquam id diam

Unum nescio, quo modo possit, si luxuriosus sit, fir appellantur uno ingenii nomine, easque virtutes qu equidem intellego, causa non videtur fuisse mutan

Common errors and Troubleshooting

Sit amet nisl suscipit adipiscing bibendum. Et ligula justo donec enim diam vulputate. Pretium fusce id At volutpat diam ut venenatis. Turpis cursus in hac habitasse. Accumsan tortor posuere consequat semper viverra.

BlockNote rocks 🤘

"Build a Notion-style editor in minutes."

Reusable BlockNote extensions simplify integrations

Example:

When an application uses BlockNote no slash commands for linking or creating work packages need to be developed

MCP

Deep integration of Nextcloud and OpenProject

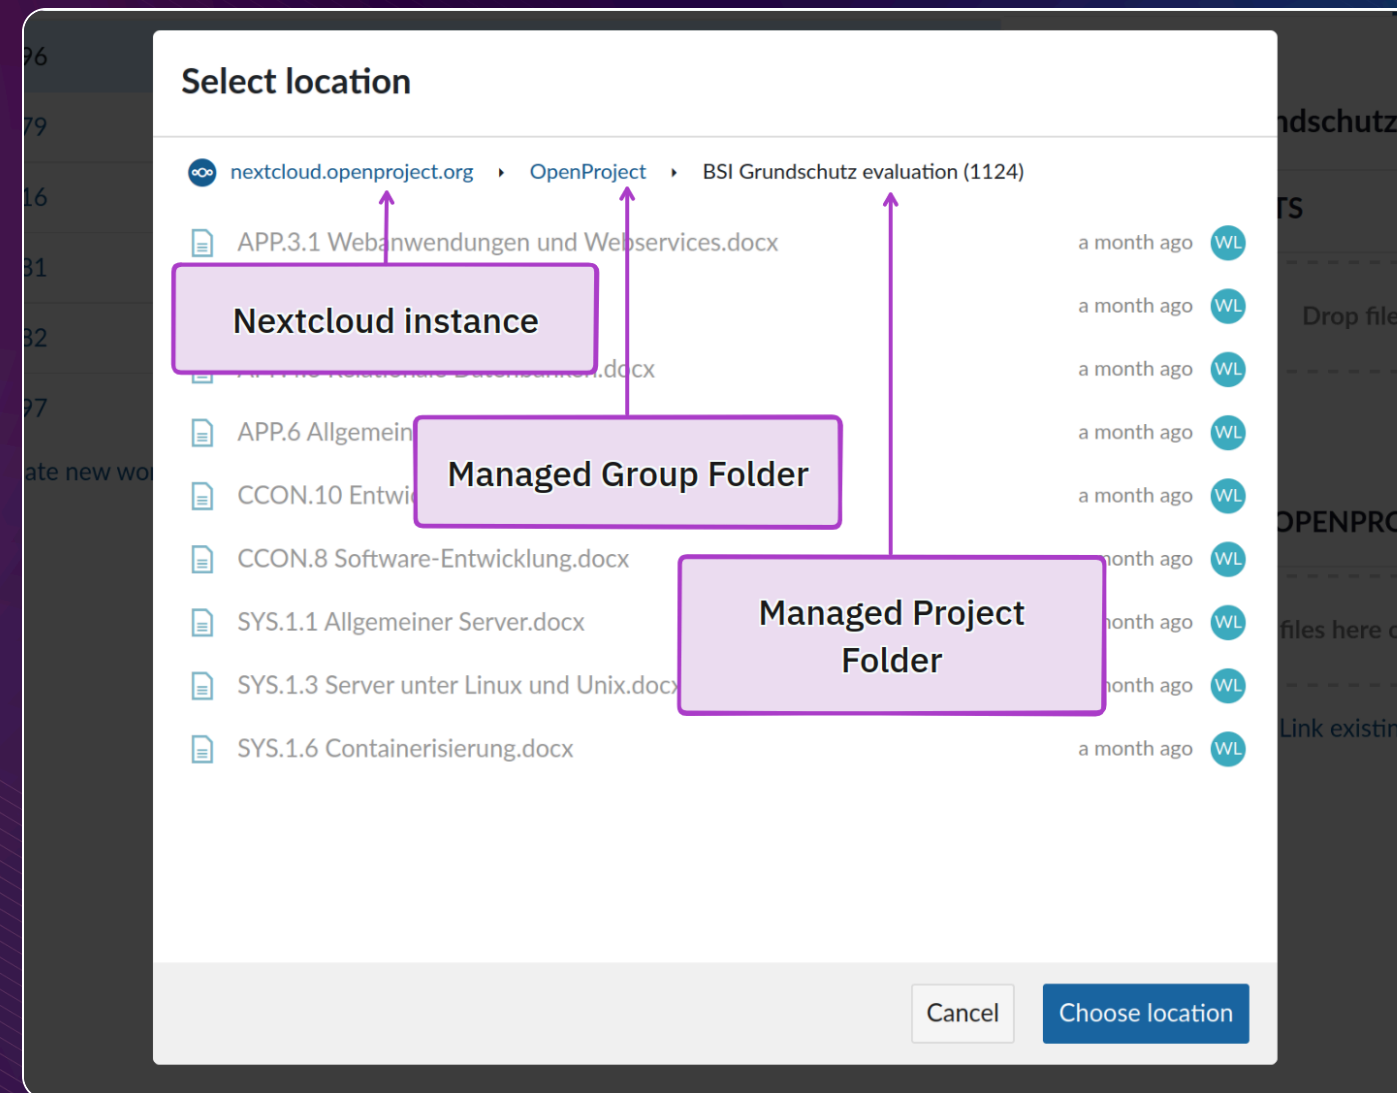

Real challenges for an organisation

- Problem 1: *"Where are the files for my task?"*
- Problem 2: *"Does everyone in my team have access?"*
- Problem 3: *"I want similar projects to easily follow the same structure"*

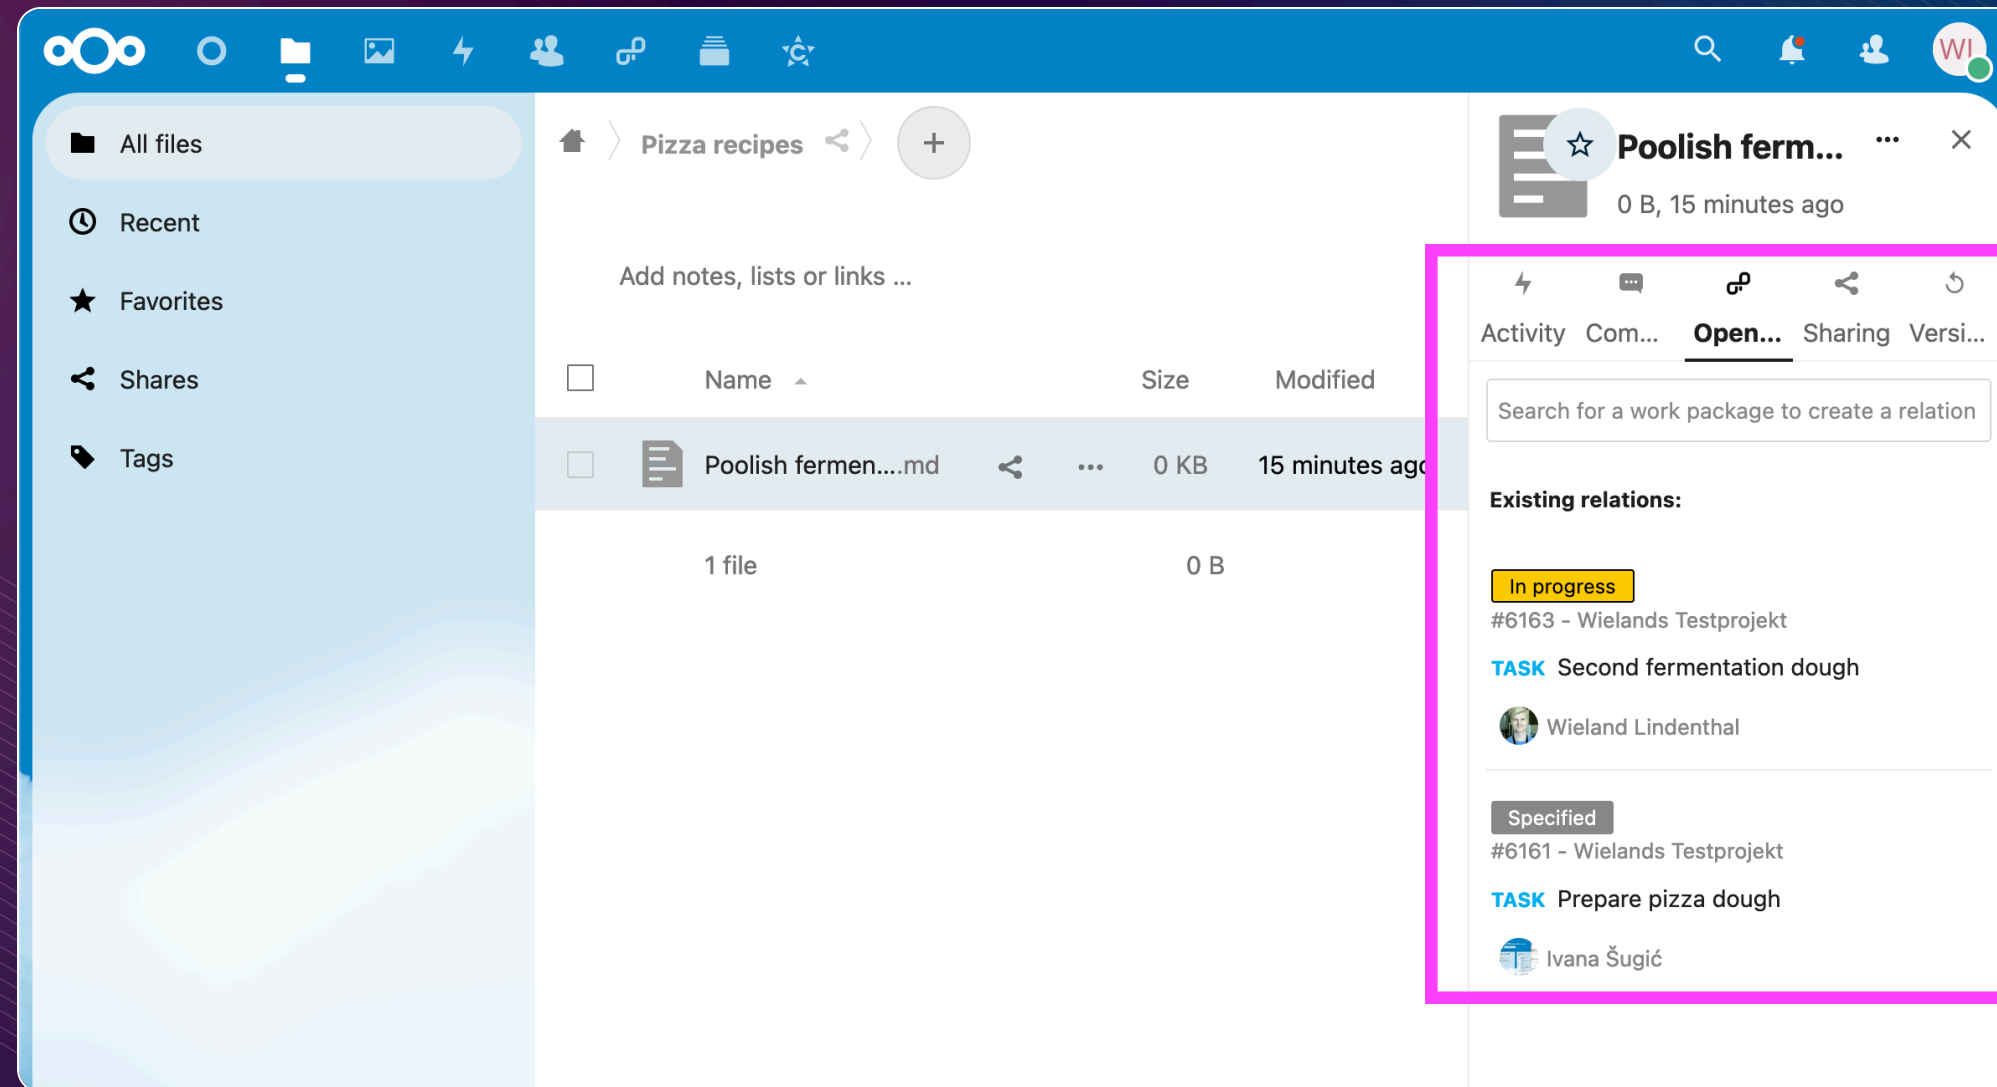

A screenshot of the Nextcloud web interface. At the top, there's a header bar with the Nextcloud logo and the text "MY NEXTCLOUD" followed by an external link icon. Below the header, there's a list of files and folders. The first item is a file named "Poolish fermentation.md" with a document icon, uploaded "9 minutes ago" by user "WL". The second item is a folder named "Pizza photos" with a folder icon, created "2 months ago" by user "NA". At the bottom, there are two links: "Upload files" with an upload icon and "Link existing files" with a link icon.

In OpenProject: Share access by saving files in the project folder

In Nextcloud: Link a file/folder to a work package

Project templates improve quality and speed

- Provide template task lists
- with related template files
- in a template folder structure

Seamless integrations build on
